WORK EXPERIENCE

July 2024 — Present

Junior Backend Developer, Fupico

I volunteer in the development of an open-source task tracking application using ASP.NET Core and related technologies, including Entity Framework and LINQ. I am involved in implementing features such as data modeling, database interactions, and backend logic to enhance the application's functionality.

May 2024 — Present

Junior Backend Developer, Orthero Aligner

I contribute to the development of a large-scale project using Django and related technologies, including Django REST Framework, PostgreSQL, and Django's ORM. I am involved in enhancing areas such as user authentication, API development, and data processing tasks.

Feb 2024 — May 2024

Junior Backend Developer, OROOX

I contribute to the development of a large-scale project using C# and .NET Core technologies, along with tools such as Entity Framework, AutoMapper, and Fluent API. I am involved in enhancing areas such as e-commerce and admin panels.

Jul 2023 — Feb 2024

Information Security Specialist, QITTPRO

I had the chance to improve my skills in the field of information security. Alongside my team, we carried out processes such as risk analysis and management under ISO 27001 in various government agencies and private companies. We also worked together on creating necessary policies, developing business continuity plans, and tightening system security.

Aug 2021 — Dec 2022

Cyber Security Intership, BTS Group

During my Cyber Security Internship, I gained experience not only in cyber security, but also in system and network management, as well as software development. Specifically, I focused on tasks such as penetration testing, internal security, and log analysis in cyber security. Additionally, I participated in system and network installations, and also contributed to the support team.

- ı took part in ELK Stack installation and management
- ı took a role in the field of log analysis
- ı worked on switch and firewall configurations for various customers

Jul 2021 — Aug 2021

IT Internship, Elver

I handled computer maintenance issues, as well as server and network services. Additionally, I was involved in configuring networks and setting up servers.

EDUCATION

2021 — 2024

Management Information System, Anadolu University

Overall GPA: 2.96/4.0
